

Reliability Management Workshop

**October 26 - 27, 1999
Las Vegas, Nevada**

*Held in conjunction with the U.S. DOE Eleventh Technical
Information Exchange (TIE) Workshop*

Workshop Background

A national workshop will be convened by the U.S. EPA's Office of Science Policy (OSP) and Office of Research and Development (ORD), National Risk Management Research Laboratory (NRMRL) to review the state-of-practice in failure analysis, forensics, and reliability engineering as they apply to remediation, restoration, corrective action, and brownfields programs, with emphasis on on-site and in-situ remedies. The workshop will be held in conjunction with, and as a part of, the U.S. DOE Office of Environmental Restoration's Eleventh Annual Technical Information Exchange (TIE) Workshop.

Audience

The workshop is oriented toward remediation professionals who want to gain a better understanding of how failure analysis and reliability engineering can be applied to remediation activities to better ascertain risks and costs. These professionals include:

- Remediation Project Managers
- Remediation Engineers
- Environmental Consultants
- State and Federal Regulators
- University Researchers
- Technology Developers
